How to Connect to the UBC VPN

For any UBC web site that requires remote access via the UBC VPN, the installation instructions for installing the UBC VPN (Cisco AnyConnect app) can be found here: https://it.ubc.ca/services/email-voice-internet/myvpn/setup-documents.

Some UBC web sites are accessible from anywhere without needing the UBC VPN.

NOTE1: The VPN server name is **myvpn.ubc.ca** and you log into it with your CWL and password.

NOTE2: Change the name to **myvpn2.ubc.ca** if you are having trouble connecting to see if that helps.

NOTE3: There is one caveat for **myvpn2.ubc.ca** that probably only applies to very few of you: if I set you up in the past on the special Law VPN for some reason (meaning you log into the VPN using your CWL login name in this form, **CWL.law**), you will not be able to log into myvpn2.ubc.ca with your CWL.law. You can switch to myvpn2.ubc.ca but you will have to leave the **.law** suffix off of your CWL when you log in.
